

## Twist-Lock Systems

The SPECTRUM Twist-Lock range of single and double head point-of-use (POU) systems and cartridges represent a functional and design evolution for POU applications.

Designed for single use or in parallel offering multiple filter combinations, the SPECTRUM Twist-Lock range of cartridges deliver outstanding performance and flexibility. Suitable for a wide variety of applications from vending to potable water, they are an ideal solution for point-of-need applications.

The unique patented twist and lock cartridge connections ensure a reliable and leak-free system, whereby a simple quarter turn automatically shuts off the inlet and outlet water channels, allowing trouble free maintenance without the need to turn off water lines.

**Stylish and simple, single and double head Twist-Lock POU systems**

**38°C**

**0.2 5 1**

**6.9 bar**

**1/4"**

### Key product features

- **PTL-S** - Sediment cartridge for particulate removal
- **PTL-CB** - Carbon block cartridge for chlorine, taste and odour removal
- **PTL-HF** - Hollow fibre membrane for bacteria, cyst and virus removal

Average rejection rate:  
 bacteria 99.9999%  
 cyst 99.99%  
 viruses 99%

- **PTL-RO** - Reverse osmosis membrane

Average rejection rate: 97%  
 Max TDS: 2,000 ppm  
 pH range: 4 - 10

### Product information

Product Code	Description	Micron (µ)	Capacity (litres)	Box Quantity	Box Weight (kg)
PTL-S	Premier Twist-Lock - Sediment	5	-	15	3
PTL-CB	Premier Twist-Lock - Carbon Block	1	9,500	15	7
PTL-HF	Premier Twist-Lock - Hollow Fibre	0.2	3,800	6	9
PTL-RO	Premier Twist-Lock - Reverse Osmosis	-	-	15	6
PTL-FH1	Premier Twist-Lock filter head - Single	-	-	6	1
PTL-FH2	Premier Twist-Lock filter head - Double	-	-	3	1
